diene units and vinyl aromatic units, and further including at least one nitrogen containing terminal group.

2. (Twice Amended) A [reaction product] composition according to claim 1, wherein said carboxylic acid or said anhydride comprises succinic acid or succinic anhydride.

Board Review

3. (Twice Amended) A [reaction product] composition according to claim 1, wherein said first polymer is a thermoplastic polymer.

4. (Twice Amended) A [reaction product] composition according to claim 2, wherein said first polymer is a poly(olefin) comprised of at least 80 weight percent [C₂-C₆] α -olefin.

Board Review
B2

6. (Twice Amended) A [reaction product] composition according to claim 4, wherein said α -olefin comprises propylene.

Sl
E2

7. (Twice Amended) A [reaction product] composition according to claim 1, wherein said second polymer comprises polybutadiene units.

Board Review

8. (Twice Amended) A [reaction product] composition according to claim 1, wherein at least 40 weight percent of said second polymer comprised of conjugated diene units.

Sl
E3

9. (Twice Amended) A [reaction product] composition according to claim 7, wherein said polybutadiene units comprise at least 40 weight percent of said second polymer.

10. (Twice Amended) A [reaction product] composition according to claim 1, wherein at least 80 weight percent of the first polymer is derived from the polymerization of propylene and/or ethylene, and said at least one carboxylic acid group or said at least one anhydride of said first polymer is derived from maleic acid or maleic anhydride, and
